Asparagus, Jersey Supreme the newest asparagus release from the Jersey asparagus breeding program, Supreme has very high yield potential as demonstrated by trial results. The spear size is more uniform than the other Jersey hybrids. Supreme is quite early, cold tolerant and is adapted to temperate, warm and cool climates. This hybrid is best adapted to light to medium sandy soils. Supreme has demonstrated very good rust resistance and selected for its tolerance to fusarium.

Asparagus, Purple Passion is a unique asparagus variety especially suited to the asparagus enthusiast. Its special, attractive purple color, flavor and tenderness distinguish this variety from others. Our field trial confirms all of these attributes with taste tests conducted here. In addition, our trials indicate Purple Passion has productive yields. When cooked, the bright purple color is reduced, but when served fresh in salads it provides a colorful and flavorful accent.

Onion, Yellow Candy (plants)
Unique sweet, mild flavor; produces jumbo bulbs. Attractive white rings. Intermediate day.

Onion, Redwing (plants)
Red, slightly pungent, globe shaped, 8-10 month storage potential, long-day.

Onion, French Yellow Shallots (bulbs)
Mild, sweet, nutty onion flavor.

Strawberry, Sparkle is the best for jam and freezing. Sparkle has been known for flavorful, high-quality, attractive fruit for over 60 years. You'll be rewarded with a nice crop of tasty, medium-sized berries by not allowing the bed to become too thick. An extremely vigorous variety, Sparkle is an excellent choice for home gardeners and pick-your-own operations in northern climates. Heirloom quality.

Blueberry, Patriot is an early variety released by the University of Maine, where growing seasons are short and winter hardiness is a must. This variety is vigorous and grows upright to a height of 4 to 6 feet. Patriot adapts to many different soil types and has performed better in heavier soil than some other varieties. The fruit is large and has very good flavor.

Raspberry, Boyne is an early-season variety that is extremely winter hardy. It consistently produces deep-red, medium-sized berries. The medium sweet, aromatic flavor makes it great for freezing and jam. It will grow where other varieties experience winter injury damage to the canes.
