EQUIPMENT RENTALS

Stoltzfus 4 Ton Wet Lime or Wood Ash Spreader

Spread wood ash or lime to help modify soil pH. Soils that are less acidic or soils with a pH closer to neutral are better environments for legumes, which fix nitrogen from the atmosphere. Raising pH with wood ash is an efficient way to facilitate legume growth and nitrogen production in the soil without synthetic fertilizers.

This project is made possible through support provided by the  New Hampshire Charitable Foundation and the Neil & Louise Tillotson Fund
